

Pretty Good Music

DECENTRALIZED MUSIC STREAMING

Creators don't get their fair share

For every **\$1** generated by a stream, artists
get just **\$0.12** to **\$0.15**.

Streaming is massive – and
still growing.

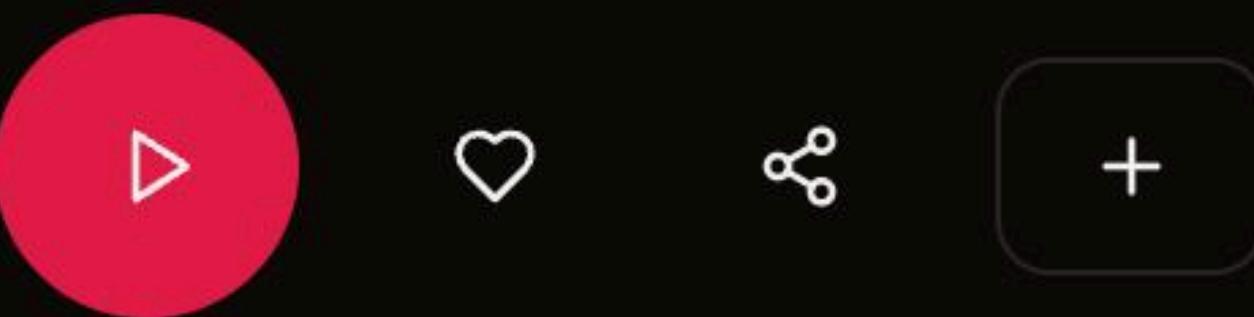

This is
Pretty Good Music,
the music
streaming app that
focuses on users,
not Web3.

Walletless, until you want to.

PRETTY GOOD MUSIC

Watercolor
Viberz

Users want a familiar music playing experience, not a crypto tutorial.

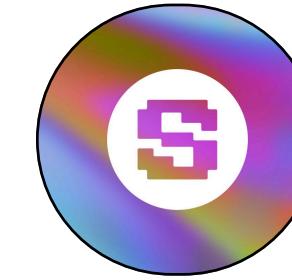

”Spotify Rakes in \$499M Profit After Lowering Artist Royalties Using Bundling Strategy“

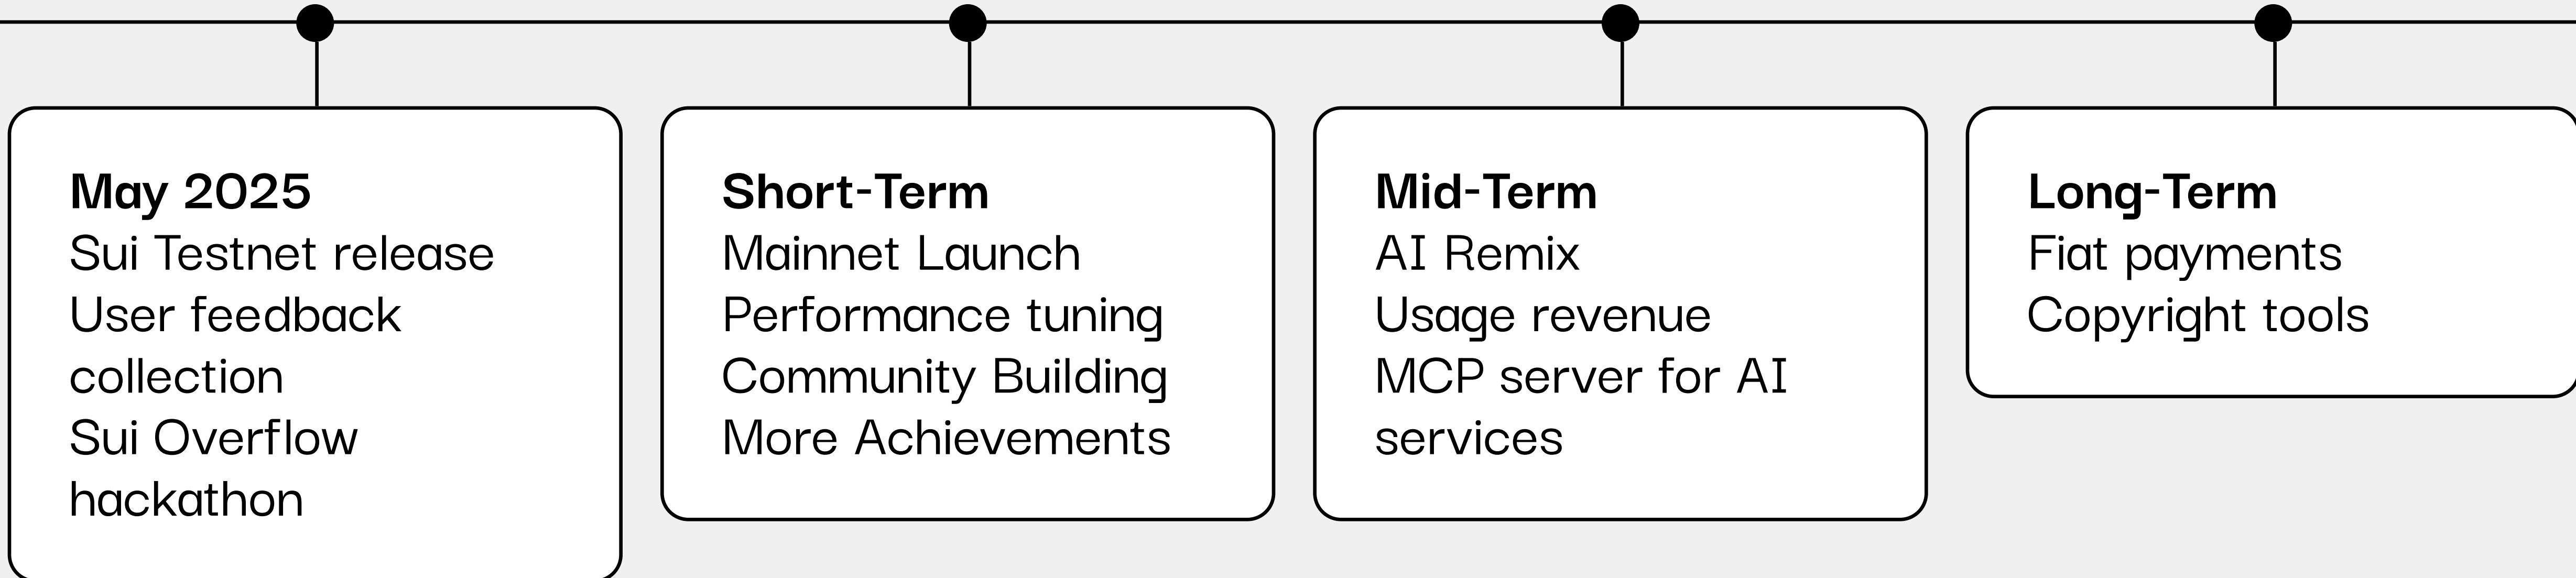

”Web3 should be invisible until it's valuable - not before.“

”I dropped a song. I have no idea who listened—and I can't reach them again.“

What's on the horizon

Strong technical team

We've **shipped** production software across **web2** and **web3**.

Backend to smart contracts, infra to frontend—end to end, our **expertise** covers it all.

Built on a **mature stack** with modern tooling.

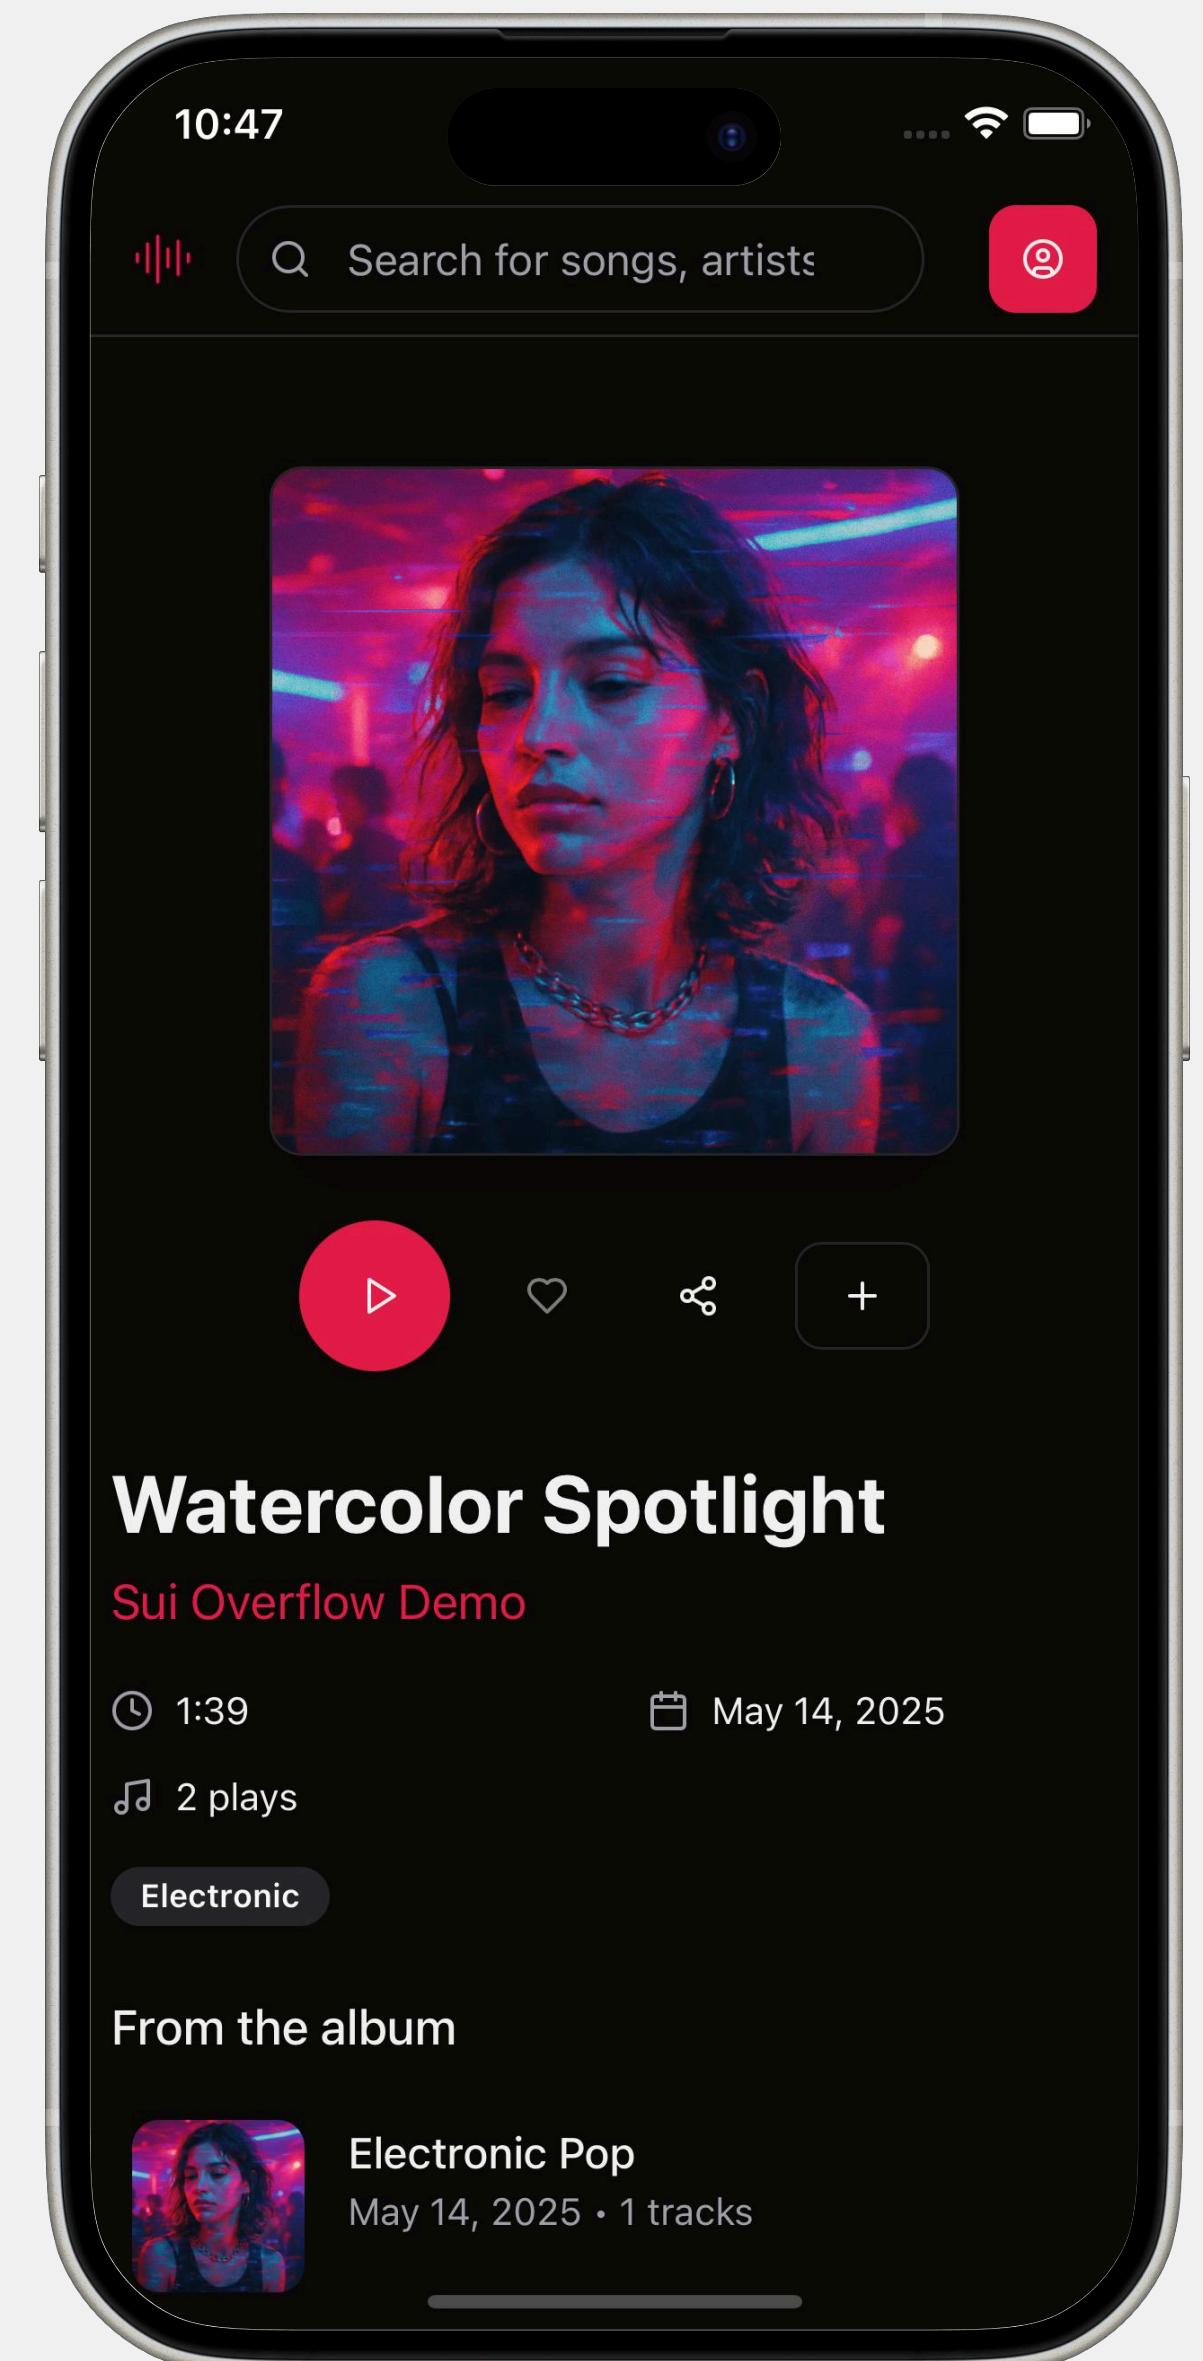

Web & Standalone

Built as a Progressive Web Application,
PrettyGoodMusic works everywhere, all the
time.

Even offline.

Crypto users have access to their browser
wallet for payments, no dedicated in-app wallet
required.

Or check it live at
<https://prettygood.music/>

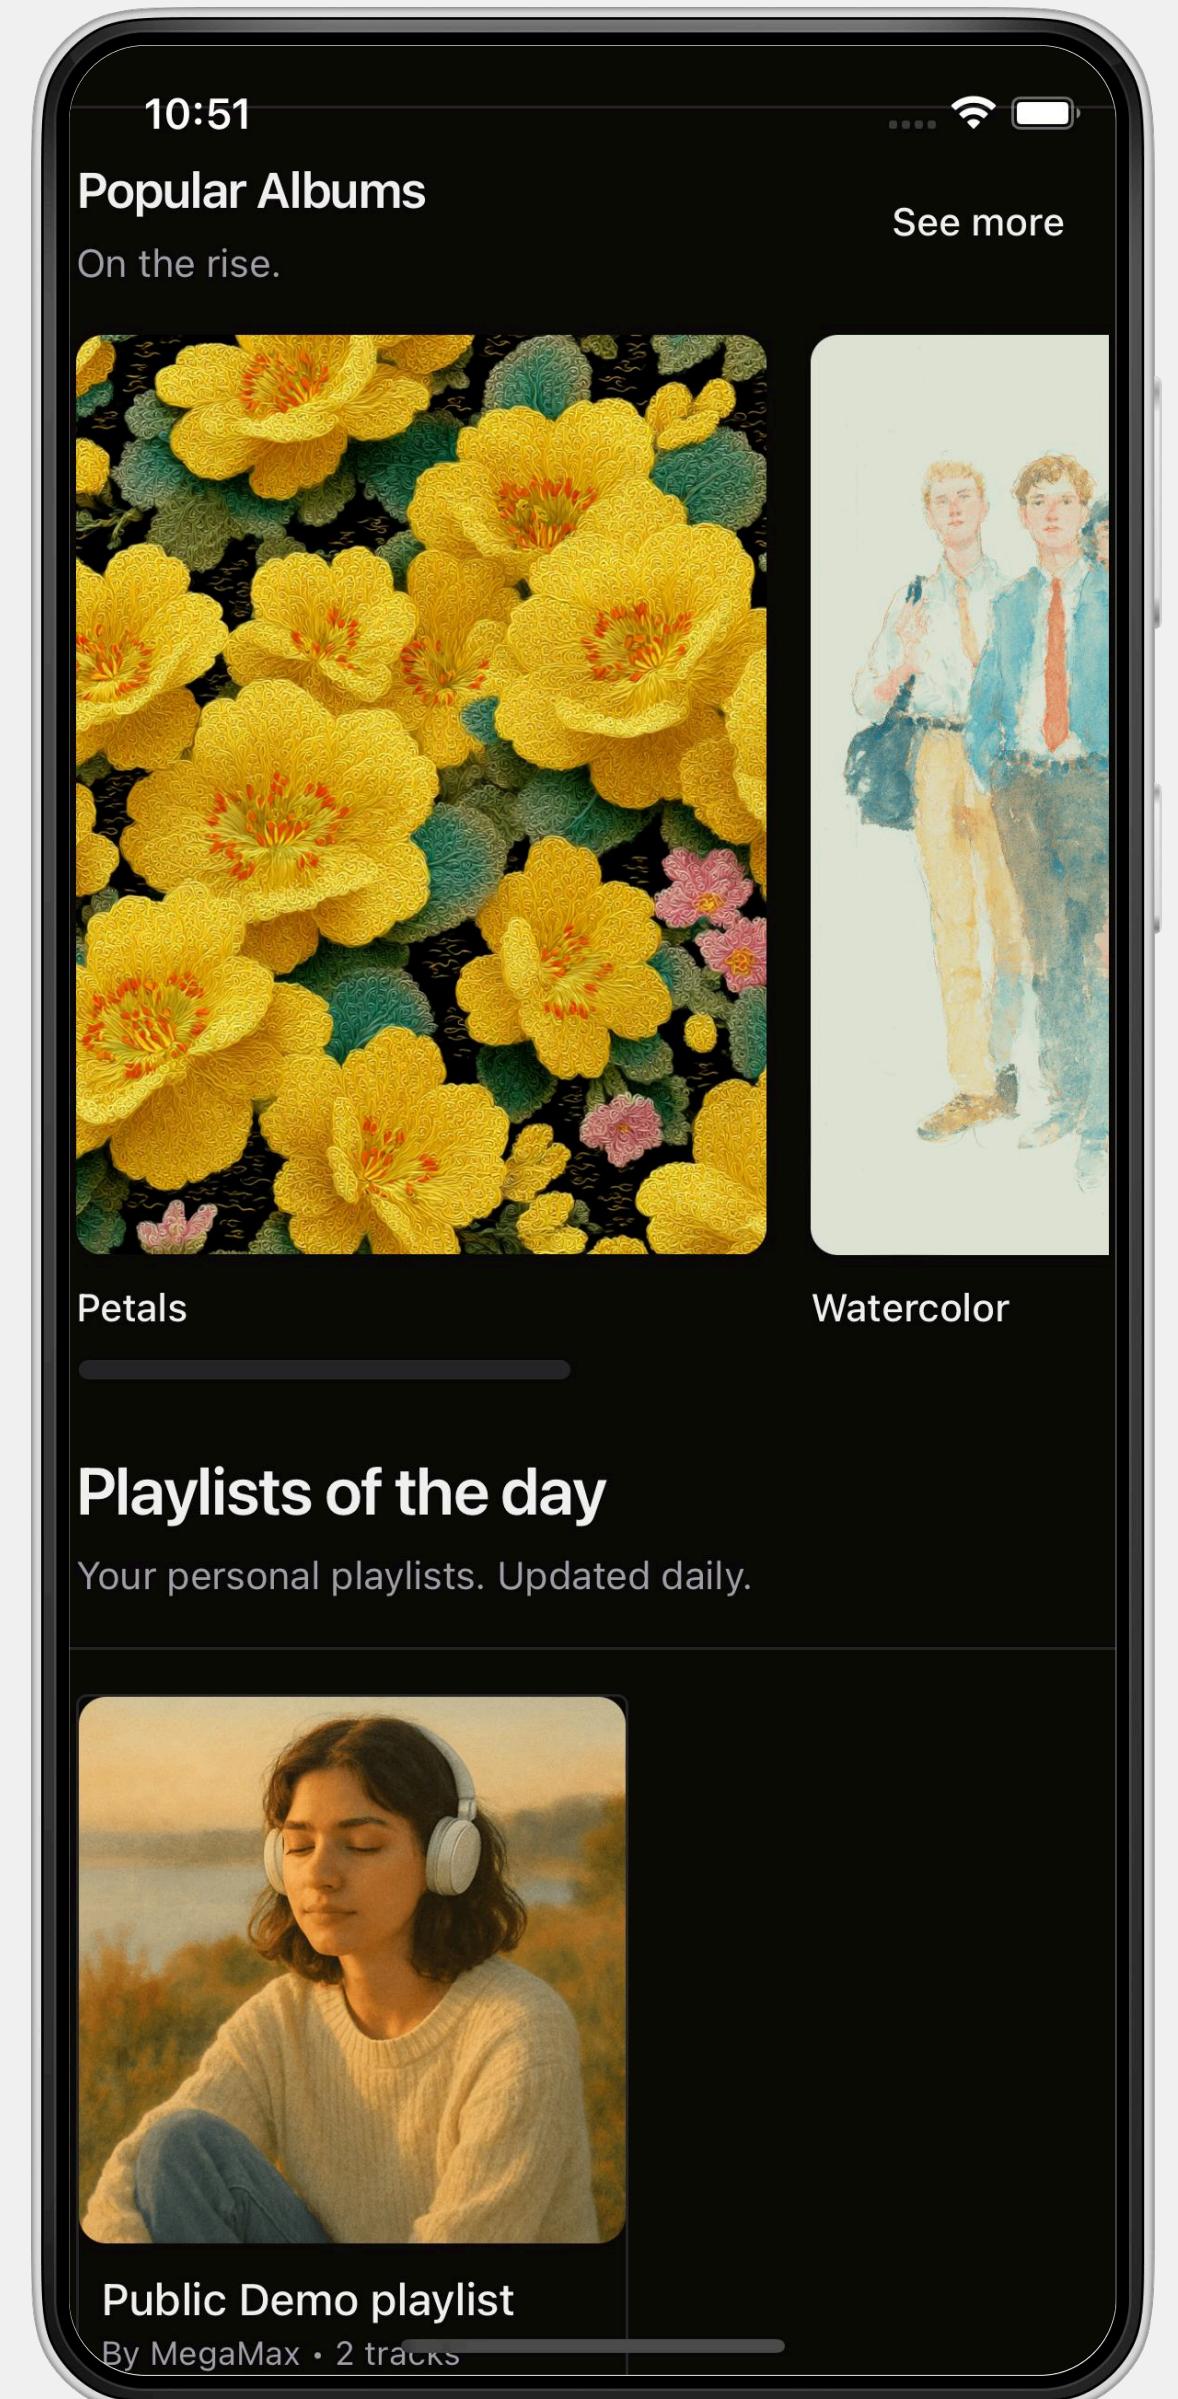

Recommendations

Get content you'll like, albums, tracks and playlists.

Right on your **Homepage**.
